

## GT-WL-F Water Level Meter (Flat Type)

- Slim-line 14 mm probe
- High accuracy
- Simple to use
- Easy to clean
- Robust construction
- Compact design
- Calibration certificate

Geotech Water Level Meter (Dip Meter) is used to determine the water level within a borehole, piezometer pipe or sump.

It consists of a stainless steel shrouded probe, specially designed to minimise displacement errors, providing unparalleled accuracy particularly within small bore piezometer installations.

As the probe is lowered into the water, a single audible buzz is heard and a red light shows.

It is mounted on a rugged lightweight drum with integral brake and probe holder for easy operation and storage with internal sensitivity control.

## Technical Specifications

Probe diameter	14 mm
Probe length	150 mm
Probe material	Stainless Steel
Tape type	mm markings
Tape coating	Cross linked polyethylene
Tape lengths <sup>1</sup>	30, 50, 100
Reel type	Polypropylene
Sound Indicator	Audible buzzer
Visual indicator	Red LED
Power	9 volt PP3 battery

<sup>&</sup>lt;sup>1</sup> Other lengths are available on request, For Order please specify Tape lengths
